

Ruggedized & Secure Push-to-Talk

SnapPTT™

KEY BENEFITS

- Secure Push-to-Talk
- MIL Spec: 810G
- IP-67 Certified
- Resistant to Petroleum Oil
- Extra Loud Speakerphone
- Worldwide Usage - GSM Standard

Your phone should be able to keep up with your demands regardless of weather conditions, geographical location and security conditions. Snap Defense Systems (SDS) introduces SnapPTT for organizations with personnel spread all around town as well as around the world with a need for instant, secure, communications. Individual users can communicate peer-to-peer or group talk with a push of a button. The SnapPTT can be deployed within a tactical private network as well as publicly available GSM networks. This phone allows you to leverage existing GSM data networks and increases your global footprint for dispersed groups or individuals.

SNAP-PTT

The SnapPTT is a ruggedized, unlocked GSM mobile phone. It boasts extended "Battery life" (up to 18 hours of talk and 1500 hours of standby) and includes, among other capabilities, GPS, LED torch, 2MP camera, and most importantly the ability to incorporate it into a secured communications platform.

SnapPTT is easy to use and allows both secured Push-to-talk as well as regular cellular calls. The secure PTT sessions can connect over low-bandwidth GPRS or EDGE networks without sacrificing sound quality or speed. This is especially helpful for organizations with human assets in countries where cellular networks do not have 3G/4G coverage.

This newest member of SDS's security solutions fully supports SDS's mission to provide rock-solid reliable lifelines for people who work and/or play in extreme environments. The SnapPTT is water submersible (IP-67 rated) and MIL-810F certified for its resistance to extreme environmental conditions. It is backed by 3-Year Unconditional Guarantee.

SnapPTT FEATURES

- EXTRA-LOUD SPEAKERS
- PROTECTION FROM MICRO PARTICLES
- PROTECTION FROM WATER
- PROTECTION FROM DROPS
- PROTECTION FROM SHOCK/VIBRATION
- PROTECTION FROM EXTREME TEMP
- RESISTANT TO EXRTEME PRESSURE
- RESISTANT TO PUNCTURES
